THE FINE PRINT

I understand that a CSA is based on the idea of shared risk and reward. In the event that the weather gets a little rocky or the farm is dropped with a calamity of uncontrollable proportions that a Share Box is not guaranteed. On the flip side, I understand that given a run of great weather I may be sharing Share Box surplus with friends and family.

I also understand that my Share Box will be donated if I don't pick it up during pickup time.
